Abstracts

The global Food Grade Hoses market size is expected to reach \$ 1217 million by 2032, rising at a market growth of 6.4% CAGR during the forecast period (2026-2032).

Food Grade Hoses are flexible industrial hoses designed for the hygienic transfer of food, beverages, dairy products, edible oils, alcohols, syrups, powders and sanitary liquids. They are made with food-contact-compliant inner linings and are designed for cleanability, pressure resistance, temperature resistance and low migration. In 2025, Global Food Grade Hoses sales are estimated at about 115 million meters, with an average ex-works price of around 6.8 US\$/meter. The value chain includes upstream silicone, EPDM, NBR, PVC, UPE, textile reinforcement, steel spirals, food-grade plasticizers and sanitary fittings; midstream manufacturers of food-grade hoses and assemblies; and downstream users in food and beverage, dairy, beer and wine, edible oil, pharmaceuticals, cosmetics and food logistics.

The growth of the Food Grade Hoses market is mainly driven by rising demand for hygienic fluid transfer and flexible connections in food and beverage, dairy, beer and soft drinks, edible oil, condiments, pharmaceutical and cosmetics industries. Stricter food safety regulations, higher automation levels in processing lines, and wider adoption of CIP/SIP cleaning processes are increasing customer requirements for non-toxic, odorless, detergent-resistant, high-temperature-resistant, oil-resistant, low-extractable, traceable and certification-compliant hoses. At the same time, the expansion of prepared foods, beverage filling, central kitchens, dairy processing and craft brewing is creating both replacement and new demand for silicone hoses, PVC food hoses, food-grade rubber hoses, composite hoses and high-cleanliness transfer hoses. Overall, the market is driven not only by hose consumption volume, but also by upgrades in food safety standards, production efficiency and hygienic material substitution, giving

suppliers with FDA, EU 10/2011, USP Class VI and customized fitting/system capabilities a stronger competitive position.
