Abstracts

The global Food Grade Isoamyl Acetate market size is expected to reach \$ 14.87 million by 2032, rising at a market growth of 4.2% CAGR during the forecast period (2026-2032).

Food-grade isoamyl acetate is a colorless, transparent liquid with a strong banana and pear aroma. It is widely used in edible flavorings and to formulate fruit flavorings such as apple and pineapple. It is extensively used in confectionery, beverages, alcoholic beverages, and baked goods, typically to impart the flavor of ripe fruit.

The upstream raw materials mainly consist of two basic chemical raw materials: acetic acid and isoamyl alcohol. Isoamyl alcohol can traditionally be obtained from fusel oils. The purity and quality of the raw materials directly determine the safety of the final food-grade product.

Global sales in 2025 are estimated at approximately 6,000 tons, with an average selling price of US\$1,800 per ton. The industry's gross profit margin is between 20% and 30%.
