Abstracts

The global Food Grade Yeast Extracts and Beta-Glucan market size is expected to reach \$ 1114.5 million by 2029, rising at a market growth of 7.5% CAGR during the forecast period (2023-2029).

Increasing consumption of processed foods, dynamic changes in dietary patterns, and increasing disposable income are expected to drive the growth of the yeast extract and beta-glucan market over the forecast period. Moreover, the demand for ready-to-eat and ready-to-eat foods containing yeast extract and β -glucan is increasing to enhance the nutritional content of food. Yeast extract is used as a flavoring agent in the food and beverage industry. Yeast extract and beta-glucan are mainly used in the production of probiotics and nutritional dietary supplements because they are natural catalysts. Rising health-conscious population, rising obesity and related problems such as diabetes and hypertension drive the demand for beta-glucan over the forecast period. In some clinical trials, beta-glucan has acquired significant anti-cancer, anti-diabetic and anti-hypercholesterolemic (controlling cholesterol levels) properties.

Glucan is a special form of soluble dietary fiber. - Glucans are derived from bacteria, fungi, yeast and grains. Yeast extract is a food flavor produced from the same yeast used to make bread and beer.
