Food Nutrition and Functional Ingredients refer to bioactive compounds, micronutrients, macronutrient enhancers, plant extracts, fermented ingredients, specialty additives, and scientifically validated functional substances incorporated into foods and beverages to deliver physiological benefits, improve nutritional value, enhance metabolism, support immunity, regulate digestion, maintain energy balance, and promote overall health, manufactured through biochemical extraction, fermentation, enzymatic processing, or synthetic methods for applications in packaged foods, dietary supplements, sports nutrition, infant nutrition, fortified beverages, and personalized nutrition solutions.

The food nutrition and functional ingredients industry chain includes upstream raw material suppliers of botanical extracts, amino acids, vitamins, enzymes, probiotics, fermentation microorganisms, marine oils, and bioactive compounds, midstream processors responsible for extraction, purification, fermentation, encapsulation, blending, formulation, and standardized quality testing, and downstream food manufacturers, supplement producers, beverage companies, sports nutrition brands, infant nutrition developers, healthcare nutrition providers, and retail channels that incorporate functional ingredients into finished goods, supported by regulatory agencies, R&D institutions, logistics networks, and marketing ecosystems that drive commercialization, innovation, safety assurance, and global distribution.

Global projects under construction and planned in the food nutrition and functional ingredients sector include expansions of fermentation capacity for probiotics and postbiotics, new production lines for plant-based proteins, omega-3 oil refining facilities, encapsulation technology centers, botanical extraction plants, vitamin synthesis upgrades, functional fiber manufacturing lines, regional ingredient innovation hubs, R&D labs for precision nutrition, regulatory-compliant cleanroom expansions, and automated blending and packaging facilities, aimed at increasing product diversity, improving cost efficiency, supporting growing demand in functional beverages and supplements, and strengthening supply chain resilience in major markets across Asia, Europe, and North America.
