## Abstracts

Food safety management software supports and ensures maintenance, compliance, and continuous improvement of end-to-end food safety processes in the food supply chain based on international standards, such as the Food Safety Modernization Act (FSMA), International Organization for Standardization (ISO) management standards, or the Food and Agriculture Organization (FAO) of the United Nations and the World Health Organization (WHO) Food Standards Program.

Managing food safety is critical for any organization working with food, including restaurants, hotels, and schools. For example, food safety management software can interact with restaurant management software, school management software, or food traceability software.
