Abstracts

Forage feed provides nutrition to livestock such as poultry, horse, sheep, swine, cattle, and others. It comprises grass, silage, legumes, hay, and extracts from harvested crops.

Scope of the Report:

This report focuses on the Forage Feed in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The forage feed market will witness growth in the cattle livestock segment because cattle is fed small proportions of hay with grain, soy, and other ingredients as supplements.

The rising demand for dairy and animal products and the availability of subsidies from the governments is driving the growth prospects of the forage feed market in APAC.

The forage crops market will witness considerable growth in this region throughout the projected period due to the steady increase in population, the shrinkage of land for grazing animals, the shifting consumer preference toward organic food and feed products, and the rising demand for dairy and animal products.

The worldwide market for Forage Feed is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
