Abstracts

Forensic technology is the use of advanced technological solutions to retrieve, search and analyze large and complex data sets. This enables end-users to gather information that can be used to address litigation issues, investigations, and requirements in regulatory and financial crime.

Scope of the Report:

This report studies the Forensic Technologies market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Forensic Technologies market by product type and applications/end industries.

The chemical analysis segment accounted for the most significant chunk of demand-share in the global forensic technologies market.

The laboratory forensics segment accounted for a considerable chunk of share of the global forensic technologies market. This is attributable to effective and efficient results in laboratory settings, as samples can be analyzed without any contamination (most of the pieces of evidence at a crime scene tend to be contaminated). Moreover, technological advancements (adoption of laboratory information management system (LIMS) software to perform multiple tasks at a time) in laboratory settings are expected to augment the market during the forecast period.

The Americas will be the major revenue contributor to the forensic science market. This mainly attributes to factors such as huge government funding for forensic labs, the presence of improved infrastructure, and key vendors, and the growing crime rates in countries such as the US, Columbia, and Brazil.

The global Forensic Technologies market is valued at xx million USD in 2017 and is

expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Forensic Technologies.
