According to our (Global Info Research) latest study, the global Forklift Magnetic Sweeper market size was valued at US\$ 94.66 million in 2025 and is forecast to a readjusted size of US\$ 140 million by 2032 with a CAGR of 5.7% during review period.

A forklift magnetic sweeper is an industrial magnetic attachment device installed on a forklift to clean ferromagnetic metal debris, such as nails, screws, steel filings, and metal fragments, from the ground. This device typically consists of high-strength permanent magnet components, a steel housing, and a mounting bracket, and can be installed on the forklift forks or the front of the frame. As the forklift moves, the magnets attract metal debris from the ground, preventing tire punctures, equipment damage, and personnel safety hazards. Forklift magnetic sweepers are widely used in manufacturing plants, logistics and warehousing centers, recycling facilities, construction sites, and airports?anywhere metal debris is easily generated. The upstream of this industry chain mainly includes suppliers of permanent magnet materials (such as ferrite magnets and neodymium iron boron magnets), steel structural components, mounting brackets, and mechanical components. The midstream consists of magnetic sweeper manufacturers, responsible for product structure design, magnet assembly, and the development of the cleaning mechanism. Downstream customers include warehousing and logistics companies, construction companies, industrial manufacturing companies, municipal maintenance departments, and large industrial park management agencies. Products are typically sold through industrial equipment distributors, forklift accessory suppliers, and B2B direct sales channels. In 2025, the global production of magnetic sweepers for forklifts is estimated at approximately 108,200 units, with an average global market price of approximately US\$850 per unit. The gross profit margin of major companies in the industry is estimated at 28%-42%. The global production capacity of magnetic

sweepers for forklifts is estimated at approximately 144,300 units in 2025.
