The global Forklift Tires market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Forklift tires are the tires used for forklift. Forklift tire is the most integral part in determining on what surface a forklift is meant to work (smooth, flat factory floor, rough outdoor yard, etc.) Each tire has a different tread, compound and ply rating which help to ensure the tire used will best suit the application. By keeping forklift tire in good shape will reduce the stress and wear on the transmission as well as the forklift driver.

In North America market, United States is the largest region of Forklift Tires, with a market share about 85%. Camso, Titan, Continental, Trelleborg and Michelin are the key manufacturers of industry, and Camso had about 20% market share.
