Abstracts

The global Foundry Coke market size is expected to reach \$ 3792 million by 2032, rising at a market growth of 3.6% CAGR during the forecast period (2026-2032).

Foundry Coke is mainly used in blast furnace and used for copper, lead, zinc, titanium, antimony, mercury and other non-ferrous metal smelting blast furnace, reductant, play a thermite and stock column skeleton function. It is a source of heat and also helps maintain the required carbon content of the metal product. Foundry coke production requires lower temperatures and longer times than blast furnace coke. Foundry Coke has large block, low reactivity, low porosity, big shatter strength, low ash and sulfur content.

Global key players of Foundry Coke include ABC Coke (Drummond), WZK Victoria, Shanxi Qinxin, Italiana Coke, OKK, etc. The top five players hold a share about 46%. Asia-Pacific is the largest market, and has a share about 47%, followed by Europe and North America with share 28% and 16%, separately. In terms of product type, 8% ? Ash Content ?10% is the largest segment, accounting for a share of 61%. In terms of application, Machinery Casting is the largest field with a share about 58 percent.

This report studies the global Foundry Coke production, demand, key manufacturers, and key regions.
