According to our (Global Info Research) latest study, the global Four Wheel Drive Vehicle market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

An automotive 4WD system is typically used in off-road vehicles and involves the distribution of power and torque to all the four wheels. The system may be fitted as a full-time or an on-demand functionality. This distribution of power to all the four wheels helps in attaining better driving characteristics in low-traction conditions.

The SUVs and crossover segment dominated the automotive 4WD vehicle market and accounted for a major part of the overall market share. The rising volume sales of these vehicles in the US, Canada, China, Indonesia, Malaysia, and India are the major factor driving the growth of this segment. The increasing availability of small-size or compact SUVs has significantly influenced the global demand for the 4wd vehicles. With rising demand for crossovers in developing countries, the SUVs and crossovers segment is expected to dominate the four wheel drive vehicle market for the next few years.
