An automotive 4WD system is typically used in off-road vehicles and involves the distribution of power and torque to all the four wheels. The system may be fitted as a full-time or an on-demand functionality. This distribution of power to all the four wheels helps in attaining better driving characteristics in low-traction conditions.

Scope of the Report:

This report focuses on the Four Wheel Drive Vehicle in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The SUVs and crossover segment dominated the automotive 4WD vehicle market and accounted for a major part of the overall market share. The rising volume sales of these vehicles in the US, Canada, China, Indonesia, Malaysia, and India are the major factor driving the growth of this segment. The increasing availability of small-size or compact SUVs has significantly influenced the global demand for the 4wd vehicles. With rising demand for crossovers in developing countries, the SUVs and crossovers segment is expected to dominate the four wheel drive vehicle market for the next few years.

In this market study, analysts have estimated the Americas to dominate the automotive 4WD vehicle market during the forecast period. The high popularity of large and big vehicles, such as SUVs and pickup trucks, drives the market growth of automotive 4WD systems in the Americas. Moreover, decreasing gasoline prices per gallon, growing credit availability, and the emergence of new models of 4wd cars are expected to propel the growth of the four wheel drive vehicle market in the region further.
