Abstracts

The global Fourth-generation Nuclear Reactors market size is expected to reach \$ 13945 million by 2032, rising at a market growth of 7.7% CAGR during the forecast period (2026-2032).

Fourth-generation nuclear reactors refer to advanced nuclear energy systems developed beyond Generation III and III+ reactor technologies, featuring innovative reactor designs, advanced fuel cycles, enhanced safety mechanisms, and improved resource utilization efficiency. This market covers next-generation reactor technologies based on advanced coolants, fast neutron systems, high-temperature operation, passive safety structures, closed fuel cycles, and modular reactor concepts. Major technology pathways include Sodium-Cooled Fast Reactors (SFR), Lead-Cooled Fast Reactors (LFR), Gas-Cooled Fast Reactors (GFR), Very High-Temperature Gas-Cooled Reactors (VHTR), Supercritical Water-Cooled Reactors (SCWR), and Molten Salt Reactors (MSR). These reactor systems are designed for electricity generation, industrial heat supply, hydrogen production, seawater desalination, and distributed energy applications, representing a key direction for future low-carbon energy development.

Key Findings

Generation IV reactors focus on six major technology routes promoted by the Generation IV International Forum

Fast reactor and molten salt reactor technologies represent major commercialization directions

Small modular Generation IV reactors are receiving increasing attention for flexible deployment

China, the United States, Russia, and Europe are major regions for advanced reactor development

Industrial heat and hydrogen production are emerging application scenarios beyond electricity generation

Market Trends

The development trend of fourth-generation nuclear reactors is moving toward higher safety performance, improved fuel efficiency, modular deployment, and multi-purpose energy applications. Advanced reactor developers are accelerating the commercialization of small modular designs, passive safety systems, digital control platforms, and closed fuel cycle technologies. Compared with conventional nuclear power systems, Generation IV reactors are increasingly designed to provide not only electricity but also industrial process heat, hydrogen production, and integrated energy solutions. The market is also shifting toward demonstration projects and early commercial deployment, with increasing focus on reducing construction costs, shortening project schedules, improving operational flexibility, and achieving compatibility with future low-carbon energy systems.

Market Dynamics

Drivers

The transition toward low-carbon energy systems, rising demand for stable clean energy sources, and the need for higher fuel utilization efficiency are major drivers for Generation IV nuclear reactor development. Growing requirements for energy security, decarbonization of industrial sectors, and replacement of aging power infrastructure are encouraging governments and energy companies to invest in advanced nuclear technologies. The ability of Generation IV reactors to provide electricity, industrial heat, and hydrogen production further expands their potential role in future energy systems.

Restraints

The commercialization of fourth-generation nuclear reactors faces challenges related to high research and development costs, long technology validation cycles, complex regulatory approval processes, and limited operating experience compared with conventional reactors. Large-scale deployment requires significant investment in demonstration projects, supply chain development, advanced materials, nuclear fuel availability, and specialized manufacturing capabilities.

Opportunities

Fourth-generation nuclear reactors have significant opportunities in emerging clean energy applications, particularly industrial decarbonization, hydrogen production, remote energy supply, and integration with renewable energy systems. Small modular Generation IV reactors may create new market opportunities through flexible deployment models for isolated regions, industrial parks, and energy-intensive industries. Advances in nuclear materials, digital simulation, artificial intelligence-based monitoring, and advanced manufacturing technologies are expected to accelerate commercialization.

Challenges

The industry faces risks including uncertain commercialization timelines, technology competition among different reactor concepts, cost competitiveness compared with renewable energy and conventional nuclear power, and the need for long-term regulatory acceptance. Maintaining nuclear safety standards while achieving economic competitiveness remains a critical challenge for technology developers and project operators.

Industry Chain Analysis

The fourth-generation nuclear reactor industry chain covers upstream nuclear materials, fuel technologies, component manufacturing, reactor engineering, and downstream energy applications. The upstream segment includes nuclear fuel production, advanced structural materials, coolant materials, control systems, sensors, and specialized manufacturing equipment. The midstream segment consists of reactor designers, engineering companies, nuclear equipment manufacturers, and system integration

providers responsible for reactor design, construction, commissioning, and operation support. The downstream segment includes nuclear power generation, industrial heat supply, hydrogen production, seawater desalination, and distributed energy applications. Value creation is mainly concentrated in reactor design capability, nuclear safety technologies, advanced materials, fuel cycle innovation, and commercialization experience.

Value Chain Analysis

The value chain of Generation IV nuclear reactors is driven by technology innovation, engineering integration, and long-term operational capabilities. Reactor developers create value through advanced reactor concepts, safety systems, fuel cycle optimization, and commercialization strategies, while equipment suppliers contribute through high-performance materials, precision manufacturing, and nuclear-grade components. Energy operators and industrial users create downstream value by integrating advanced reactors into electricity, industrial heat, hydrogen, and comprehensive energy supply systems.

Segment Insights

By reactor coolant type, Sodium-Cooled Fast Reactors, Lead-Cooled Fast Reactors, Very High-Temperature Gas-Cooled Reactors, and Molten Salt Reactors represent the most active development pathways, while Supercritical Water-Cooled Reactors and Gas-Cooled Fast Reactors remain at earlier research and development stages. Fast reactor technologies focus on fuel utilization improvement and closed fuel cycles, while high-temperature reactors emphasize industrial heat and hydrogen applications. By power scale, micro-sized and small modular Generation IV reactors are attracting increasing attention because of their flexible deployment characteristics, while medium and large-scale reactors remain important for future utility-scale power generation.

Downstream Market Opportunities

The downstream opportunities of Generation IV nuclear reactors extend beyond traditional electricity generation toward industrial energy applications. Nuclear power generation remains the primary commercialization direction, while industrial heat supply, hydrogen production, and seawater desalination are becoming important growth areas. High-temperature reactor technologies have particular potential in chemical processing,

steel manufacturing, synthetic fuel production, and hydrogen economy applications. Modular reactor designs may also support remote communities, mining areas, and distributed energy systems.

Regional Insights

North America, Europe, China, and Russia represent the major regions for Generation IV nuclear reactor development. North America has strong innovation capabilities in small modular reactors, molten salt reactors, and advanced nuclear startups, supported by technology companies and demonstration programs. China has developed a broad advanced reactor research portfolio covering high-temperature gas-cooled reactors, fast reactors, and molten salt technologies, while Russia maintains extensive experience in fast reactor engineering. Europe continues to advance advanced nuclear technologies through research programs focused on safety, sustainability, and industrial decarbonization.

Competitive Landscape Analysis

The competitive landscape of fourth-generation nuclear reactors is characterized by technology-route competition among established nuclear companies, government-backed research organizations, and emerging reactor developers. Companies such as TerraPower, Rosatom, CNNC, X-energy, Kairos Power, Oklo, General Atomics, Terrestrial Energy, ARC Clean Technology, Mitsubishi Heavy Industries, and other nuclear technology organizations are advancing different reactor concepts. Competition is mainly focused on reactor design maturity, safety performance, fuel cycle capability, regulatory progress, construction economics, and commercialization speed rather than traditional market share competition.

Report Scope

This report studies the global Fourth-generation Nuclear Reactors demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Fourth-generation Nuclear Reactors, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand

trends and competition, as well as details the characteristics of Fourth-generation Nuclear Reactors that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Fourth-generation Nuclear Reactors total market, 2021-2032, (USD Million)

Global Fourth-generation Nuclear Reactors total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Fourth-generation Nuclear Reactors total market, key domestic companies, and share, (USD Million)

Global Fourth-generation Nuclear Reactors revenue by player, revenue and market share 2021-2026, (USD Million)

Global Fourth-generation Nuclear Reactors total market by Type, CAGR, 2021-2032, (USD Million)

Global Fourth-generation Nuclear Reactors total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Fourth-generation Nuclear Reactors market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include TerraPower, Rosatom, Atomenergoproekt, CNNC, Hitachi Energy, OKBM Afrikantov, BHAVINI, X-energy, Kairos Power, Oklo, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Fourth-generation Nuclear Reactors market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Global Fourth-generation Nuclear Reactors Market, By Region:

United States

China

Europe

Japan

South Korea

ASEAN

India

Rest of World

Market Segmentation

Global Fourth-generation Nuclear Reactors Market, Segmentation by Type:

Sodium-Cooled Fast Reactor (SFR)

Lead-Cooled Fast Reactor (LFR)

Gas-Cooled Fast Reactor (GFR)

Very High-Temperature Gas-Cooled Reactor (VHTR)

Supercritical Water-Cooled Reactor (SCWR)

Molten Salt Reactor (MSR)

Global Fourth-generation Nuclear Reactors Market, Segmentation by Power Scale:

Micro-sized Generation IV Nuclear Reactors (<20 MWe)

Small modular Generation IV Nuclear Reactors (20–300 MWe)

Medium-sized Generation IV Nuclear Reactors (300–600 MWe)

Large-scale Generation IV Nuclear Reactors (600–1,500 MWe)

Global Fourth-generation Nuclear Reactors Market, Segmentation by Application:

Nuclear Power Generation

Industrial Heat Supply

Hydrogen Production

Seawater Desalination

Others

Companies Profiled:

TerraPower

Rosatom

Atomenergoproekt

CNNC

Hitachi Energy

OKBM Afrikantov

BHAVINI

X-energy

Kairos Power

Oklo

General Atomics

Terrestrial Energy

ARC Clean Technology

China Huaneng

Mitsubishi Heavy Industries

Key Questions Answered

1. How big is the global Fourth-generation Nuclear Reactors market?
2. What is the demand of the global Fourth-generation Nuclear Reactors market?
3. What is the year over year growth of the global Fourth-generation Nuclear Reactors market?
4. What is the total value of the global Fourth-generation Nuclear Reactors market?
5. Who are the Major Players in the global Fourth-generation Nuclear Reactors market?
6. What are the growth factors driving the market demand?

Contents

1 SUPPLY SUMMARY

1.1 Fourth-generation Nuclear Reactors Introduction

1.2 World Fourth-generation Nuclear Reactors Market Size & Forecast (2021 & 2025 & 2032)

1.3 World Fourth-generation Nuclear Reactors Total Market by Region (by Headquarter Location)

1.3.1 World Fourth-generation Nuclear Reactors Market Size by Region (2021-2032), (by Headquarter Location)

1.3.2 United States Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.3.3 China Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.3.4 Europe Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.3.5 Japan Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.3.6 South Korea Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.3.7 ASEAN Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.3.8 India Based Company Fourth-generation Nuclear Reactors Revenue (2021-2032)

1.4 Market Drivers, Restraints and Trends

1.4.1 Fourth-generation Nuclear Reactors Market Drivers

1.4.2 Factors Affecting Demand

1.4.3 Major Market Trends

2 DEMAND SUMMARY

2.1 World Fourth-generation Nuclear Reactors Consumption Value (2021-2032)

2.2 World Fourth-generation Nuclear Reactors Consumption Value by Region

2.2.1 World Fourth-generation Nuclear Reactors Consumption Value by Region (2021-2026)

2.2.2 World Fourth-generation Nuclear Reactors Consumption Value Forecast by Region (2027-2032)

2.3 United States Fourth-generation Nuclear Reactors Consumption Value (2021-2032)

- 2.4 China Fourth-generation Nuclear Reactors Consumption Value (2021-2032)
- 2.5 Europe Fourth-generation Nuclear Reactors Consumption Value (2021-2032)
- 2.6 Japan Fourth-generation Nuclear Reactors Consumption Value (2021-2032)
- 2.7 South Korea Fourth-generation Nuclear Reactors Consumption Value (2021-2032)
- 2.8 ASEAN Fourth-generation Nuclear Reactors Consumption Value (2021-2032)
- 2.9 India Fourth-generation Nuclear Reactors Consumption Value (2021-2032)

3 WORLD FOURTH-GENERATION NUCLEAR REACTORS COMPANIES COMPETITIVE ANALYSIS

- 3.1 World Fourth-generation Nuclear Reactors Revenue by Player (2021-2026)
- 3.2 Industry Rank and Concentration Rate (CR)
 - 3.2.1 Global Fourth-generation Nuclear Reactors Industry Rank of Major Players
 - 3.2.2 Global Concentration Ratios (CR4) for Fourth-generation Nuclear Reactors in 2025
 - 3.2.3 Global Concentration Ratios (CR8) for Fourth-generation Nuclear Reactors in 2025
- 3.3 Fourth-generation Nuclear Reactors Company Evaluation Quadrant
- 3.4 Fourth-generation Nuclear Reactors Market: Overall Company Footprint Analysis
 - 3.4.1 Fourth-generation Nuclear Reactors Market: Region Footprint
 - 3.4.2 Fourth-generation Nuclear Reactors Market: Company Product Type Footprint
 - 3.4.3 Fourth-generation Nuclear Reactors Market: Company Product Application Footprint
- 3.5 Competitive Environment
 - 3.5.1 Historical Structure of the Industry
 - 3.5.2 Barriers of Market Entry
 - 3.5.3 Factors of Competition
- 3.6 Mergers & Acquisitions Activity

4 UNITED STATES VS CHINA VS REST OF WORLD (BY HEADQUARTER LOCATION)

- 4.1 United States VS China: Fourth-generation Nuclear Reactors Revenue Comparison (by Headquarter Location)
 - 4.1.1 United States VS China: Fourth-generation Nuclear Reactors Revenue Comparison (2021 & 2025 & 2032) (by Headquarter Location)
 - 4.1.2 United States VS China: Fourth-generation Nuclear Reactors Revenue Market Share Comparison (2021 & 2025 & 2032)
- 4.2 United States Based Companies VS China Based Companies: Fourth-generation

Nuclear Reactors Consumption Value Comparison

4.2.1 United States VS China: Fourth-generation Nuclear Reactors Consumption Value Comparison (2021 & 2025 & 2032)

4.2.2 United States VS China: Fourth-generation Nuclear Reactors Consumption Value Market Share Comparison (2021 & 2025 & 2032)

4.3 United States Based Fourth-generation Nuclear Reactors Companies and Market Share, 2021-2026

4.3.1 United States Based Fourth-generation Nuclear Reactors Companies, Headquarters (States, Country)

4.3.2 United States Based Companies Fourth-generation Nuclear Reactors Revenue, (2021-2026)

4.4 China Based Companies Fourth-generation Nuclear Reactors Revenue and Market Share, 2021-2026

4.4.1 China Based Fourth-generation Nuclear Reactors Companies, Company Headquarters (Province, Country)

4.4.2 China Based Companies Fourth-generation Nuclear Reactors Revenue, (2021-2026)

4.5 Rest of World Based Fourth-generation Nuclear Reactors Companies and Market Share, 2021-2026

4.5.1 Rest of World Based Fourth-generation Nuclear Reactors Companies, Headquarters (Province, Country)

4.5.2 Rest of World Based Companies Fourth-generation Nuclear Reactors Revenue (2021-2026)

5 MARKET ANALYSIS BY TYPE

5.1 World Fourth-generation Nuclear Reactors Market Size Overview by Type: 2021 VS 2025 VS 2032

5.2 Segment Introduction by Type

5.2.1 Sodium-Cooled Fast Reactor (SFR)

5.2.2 Lead-Cooled Fast Reactor (LFR)

5.2.3 Gas-Cooled Fast Reactor (GFR)

5.2.4 Very High-Temperature Gas-Cooled Reactor (VHTR)

5.2.5 Supercritical Water-Cooled Reactor (SCWR)

5.2.6 Molten Salt Reactor (MSR)

5.3 Market Segment by Type

5.3.1 World Fourth-generation Nuclear Reactors Market Size by Type (2021-2026)

5.3.2 World Fourth-generation Nuclear Reactors Market Size by Type (2027-2032)

5.3.3 World Fourth-generation Nuclear Reactors Market Size Market Share by Type

(2027-2032)

6 MARKET ANALYSIS BY POWER SCALE

6.1 World Fourth-generation Nuclear Reactors Market Size Overview by Power Scale:
2021 VS 2025 VS 2032

6.2 Segment Introduction by Power Scale

6.2.1 Micro-sized Generation IV Nuclear Reactors (<20 MWe)

6.2.2 Small modular Generation IV Nuclear Reactors (20–300 MWe)

6.2.3 Medium-sized Generation IV Nuclear Reactors (300–600 MWe)

6.2.4 Large-scale Generation IV Nuclear Reactors (600–1,500 MWe)

6.3 Market Segment by Power Scale

6.3.1 World Fourth-generation Nuclear Reactors Market Size by Power Scale
(2021-2026)

6.3.2 World Fourth-generation Nuclear Reactors Market Size by Power Scale
(2027-2032)

6.3.3 World Fourth-generation Nuclear Reactors Market Size Market Share by Power
Scale (2027-2032)

7 MARKET ANALYSIS BY APPLICATION

7.1 World Fourth-generation Nuclear Reactors Market Size Overview by Application:
2021 VS 2025 VS 2032

7.2 Segment Introduction by Application

7.2.1 Nuclear Power Generation

7.2.2 Industrial Heat Supply

7.2.3 Hydrogen Production

7.2.4 Seawater Desalination

7.2.5 Others

7.3 Market Segment by Application

7.3.1 World Fourth-generation Nuclear Reactors Market Size by Application
(2021-2026)

7.3.2 World Fourth-generation Nuclear Reactors Market Size by Application
(2027-2032)

7.3.3 World Fourth-generation Nuclear Reactors Market Size Market Share by
Application (2021-2032)

8 COMPANY PROFILES

8.1 TerraPower

8.1.1 TerraPower Details

8.1.2 TerraPower Major Business

8.1.3 TerraPower Fourth-generation Nuclear Reactors Product and Services

8.1.4 TerraPower Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)

8.1.5 TerraPower Recent Developments/Updates

8.1.6 TerraPower Competitive Strengths & Weaknesses

8.2 Rosatom

8.2.1 Rosatom Details

8.2.2 Rosatom Major Business

8.2.3 Rosatom Fourth-generation Nuclear Reactors Product and Services

8.2.4 Rosatom Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)

8.2.5 Rosatom Recent Developments/Updates

8.2.6 Rosatom Competitive Strengths & Weaknesses

8.3 Atomenergoproekt

8.3.1 Atomenergoproekt Details

8.3.2 Atomenergoproekt Major Business

8.3.3 Atomenergoproekt Fourth-generation Nuclear Reactors Product and Services

8.3.4 Atomenergoproekt Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)

8.3.5 Atomenergoproekt Recent Developments/Updates

8.3.6 Atomenergoproekt Competitive Strengths & Weaknesses

8.4 CNNC

8.4.1 CNNC Details

8.4.2 CNNC Major Business

8.4.3 CNNC Fourth-generation Nuclear Reactors Product and Services

8.4.4 CNNC Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)

8.4.5 CNNC Recent Developments/Updates

8.4.6 CNNC Competitive Strengths & Weaknesses

8.5 Hitachi Energy

8.5.1 Hitachi Energy Details

8.5.2 Hitachi Energy Major Business

8.5.3 Hitachi Energy Fourth-generation Nuclear Reactors Product and Services

8.5.4 Hitachi Energy Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)

8.5.5 Hitachi Energy Recent Developments/Updates

- 8.5.6 Hitachi Energy Competitive Strengths & Weaknesses
- 8.6 OKBM Afrikantov
 - 8.6.1 OKBM Afrikantov Details
 - 8.6.2 OKBM Afrikantov Major Business
 - 8.6.3 OKBM Afrikantov Fourth-generation Nuclear Reactors Product and Services
 - 8.6.4 OKBM Afrikantov Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)
 - 8.6.5 OKBM Afrikantov Recent Developments/Updates
 - 8.6.6 OKBM Afrikantov Competitive Strengths & Weaknesses
- 8.7 BHAVINI
 - 8.7.1 BHAVINI Details
 - 8.7.2 BHAVINI Major Business
 - 8.7.3 BHAVINI Fourth-generation Nuclear Reactors Product and Services
 - 8.7.4 BHAVINI Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)
 - 8.7.5 BHAVINI Recent Developments/Updates
 - 8.7.6 BHAVINI Competitive Strengths & Weaknesses
- 8.8 X-energy
 - 8.8.1 X-energy Details
 - 8.8.2 X-energy Major Business
 - 8.8.3 X-energy Fourth-generation Nuclear Reactors Product and Services
 - 8.8.4 X-energy Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)
 - 8.8.5 X-energy Recent Developments/Updates
 - 8.8.6 X-energy Competitive Strengths & Weaknesses
- 8.9 Kairos Power
 - 8.9.1 Kairos Power Details
 - 8.9.2 Kairos Power Major Business
 - 8.9.3 Kairos Power Fourth-generation Nuclear Reactors Product and Services
 - 8.9.4 Kairos Power Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)
 - 8.9.5 Kairos Power Recent Developments/Updates
 - 8.9.6 Kairos Power Competitive Strengths & Weaknesses
- 8.10 Oklo
 - 8.10.1 Oklo Details
 - 8.10.2 Oklo Major Business
 - 8.10.3 Oklo Fourth-generation Nuclear Reactors Product and Services
 - 8.10.4 Oklo Fourth-generation Nuclear Reactors Revenue, Gross Margin and Market Share (2021-2026)

- 8.10.5 Oklo Recent Developments/Updates
- 8.10.6 Oklo Competitive Strengths & Weaknesses

I would like to order

Product name: Global Fourth-generation Nuclear Reactors Supply, Demand and Key Producers, 2026-2032

Product link: <https://marketpublishers.com/r/G4717D854F01EN.html>

Price: US\$ 4,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/G4717D854F01EN.html>
