According to our (Global Info Research) latest study, the global Frameless Fabric Light Boxes market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Frameless fabric light boxes employ backlight fabrics. Unlike traditional light boxes where graphics are inserted into frames, to achieve a frameless appearance, fabric light boxes have their graphic edges sewn with silicone beads. These silicone beads are inserted into the perimeter of the extrusion components of the light boxes, resulting in a taut and smooth graphic surface. It boasts rich brightness and cost-effectiveness, and the ease of disassembling and replacing fabric pieces extend the product's lifespan.
