According to our (Global Info Research) latest study, the global Freestanding Electric Ranges market size was valued at US\$ 2722 million in 2025 and is forecast to a readjusted size of US\$ 4194 million by 2032 with a CAGR of 6.4% during review period.

Freestanding Electric Range is a type of kitchen appliance that combines an electric cooktop and an oven into a single, standalone unit. Characterized by its finished sides and built-in backguard or backsplash, this range can be positioned anywhere in the kitchen without the need for cabinetry support, making it highly versatile in both layout and installation. The cooktop typically features coil or smooth glass-ceramic heating elements, offering various temperature settings for boiling, simmering, or frying. Below the cooktop, the oven provides electric baking and broiling functions with precise temperature control and often includes features such as convection cooking, self-cleaning modes, and digital timers.

The global Freestanding Electric Ranges market is experiencing steady growth, driven by increasing demand for convenient, efficient, and affordable cooking appliances across residential and commercial settings. As modern lifestyles prioritize time-saving and multifunctional kitchen solutions, freestanding electric ranges have gained popularity due to their integrated cooktop and oven design, offering flexibility in cooking methods such as boiling, baking, broiling, and convection roasting. These ranges are particularly favored in homes and rental properties because they are easy to install, requiring no built-in cabinetry, and often feature a backguard with control knobs and digital displays for user convenience. The market is further fueled by urbanization trends, rising disposable incomes in developing economies, and the global push for energy-efficient electric appliances.
