Abstracts

Fresh milk products are those products that do not contain added preservatives to maintain the freshness of the product.

Scope of the Report:

This report focuses on the Fresh Milk in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The unflavoured milk segment dominated the fresh milk market and accounted for a market share. Factors such as the increasing awareness about healthy diets and the benefits of fresh milk consumption are expected to impel the growth prospects for this market.

The Americas dominated the global fresh milk market. Although, the Americas leads the market, the consumption of milk reduced considerably in the US due to an increasing number of lactose intolerant individuals. However, the consumption of milk in other countries in the region is expected to increase during the forecast period. Rising population and increasing production of milk are some of the factors contributing to the growth of the fresh milk market in the Americas.

The worldwide market for Fresh Milk is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
