According to our (Global Info Research) latest study, the global Friction Products market size was valued at USD 9324.3 million in 2023 and is forecast to a readjusted size of USD 12550 million by 2030 with a CAGR of 4.3% during review period.

Friction materials—also known as brake materials and clutch materials—are used to induce friction in situations where slow or decreased movement is necessary. Friction is the resistance to relative motion that opposes an object's direction of movement. Friction is created when a solid object comes into contact with a diverging surface. Friction can be used anywhere from slowing or stopping an object to accelerating it to a certain speed.

The report studies friction products (including brake pads, brake linings, clutch discs, brake blocks etc.) which are made from friction materials. They can be widely used in automotive, railway, industrial and aerospace field.

Global key players of friction products include Akebono Brake, Nisshinbo, Bosch, Continental, GMP Friction Products, etc. Global top three manufacturers hold a share over 30%. North America is the largest producer of friction products, holds a share over 24%, followed by Japan, Europe, and China.
