Frozen avocado is a frozen fruit product made from ripe avocados that are peeled, pitted, cut into pieces or processed into puree, and preserved using freezing technologies such as IQF, enabling long-term retention of texture, color, and nutritional value under low-temperature conditions, mainly for foodservice, food processing, and retail applications.

The global frozen avocado market is driven by health-conscious consumption trends and growing demand for ready-to-use and semi-processed foods, with demand mainly coming from foodservice chains, food manufacturers, and household consumers. On the supply side, production is highly dependent on avocado-growing regions, with Latin America playing a central role. Competition focuses on raw material stability, freezing technology, and the ability to preserve color and flavor, while penetration continues to increase in emerging markets.
