Abstracts

According to our (Global Info Research) latest study, the global Frozen Cake Base market size was valued at US\$ 6400 million in 2025 and is forecast to a readjusted size of US\$ 9366 million by 2032 with a CAGR of 5.9% during review period.

Frozen cake bases refer to standardized cake bases that have been mixed, shaped, and baked (or partially baked) and then preserved using rapid freezing technology (IQF or blast freezing). Typical parameters include: freezing temperature -18°C , shelf life 6–12 months, single-slice weight 200–1200 g, stable moisture content and texture, and the ability to be directly thawed and used or further processed. The product is usually supplied in bags or boxes (2–10 kg) and is suitable for food service and industrial processing. It solves problems in traditional cake production such as unstable recipes, high dependence on baking techniques, insufficient store space, high labor costs, significant food safety risks, and poor product consistency, enabling bakeries, coffee shops, hotels, and central kitchens to quickly produce finished cakes. The average price of this product is approximately US\$9.5 per unit, with global sales of approximately 654 million units.
