Abstracts

The global Frozen Donuts market size is expected to reach \$ 1456 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Frozen donuts are industrially produced donuts that are quickly frozen after being fried or baked, and can be reheated or thawed at retail outlets for sale. This product solves the problems of traditional donut production, such as high reliance on skilled workers, complex frying processes, significant food safety risks, limited store space, and inconsistent quality. It allows coffee shops, convenience stores, hotels, and other establishments to consistently supply highly consistent donuts without the need for professional baking staff. The average price of this product is approximately \$500 per thousand units, with global sales of approximately 2046 million units.

This report studies the global Frozen Donuts production, demand, key manufacturers, and key regions.
