## Abstracts

According to our (Global Info Research) latest study, the global Frozen Dough Slicers market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Most of the industry currently uses traditional stainless steel knives to cut dough. When the traditional stainless steel knife cuts the dough, the temperature of the dough is high. If the temperature is too low, the cutting will be laborious or everything will be broken. Therefore, at this time, the dough needs to be warmed to room temperature before cutting, which reduces the cutting efficiency. Ultrasonic frozen dough cutting equipment uses ultrasonic technology to apply ultrasonic vibration to the blade for cutting. It can easily cut dough at minus 18 degrees without external force during cutting, and there will be no fragmentation.
