Abstracts

The global Frozen Green Soybeans market size is expected to reach \$ 292.3 million by 2029, rising at a market growth of 2.9% CAGR during the forecast period (2023-2029).

Presently, frozen green soybeans are popular in Asian regions, especially in Japan. Japan is the largest consumer of frozen green soybeans. Each year, more than 70,000 tons frozen green soybeans are consumed by the region. However, due to the geographic reasons, the country produces almost no frozen green soybeans and needs to import totally. China Taiwan, China, Thailand and Indonesia are the major suppliers of Japan's frozen green soybeans. China Taiwan has kept its first place of suppliers to Japan for many years and has more than 40% sales share in the country.

Green soybeans, also known as edamame, are soybeans those are young and green when picked. Because of this, green soybeans are soft and edible, not hard and dry like the mature soybeans used to make soy milk and tofu. Green soybeans are most often found in East Asian cuisine and sold both in the pod and hulled.
