Abstracts

According to our (Global Info Research) latest study, the global Frozen Meat Grinders market size was valued at US\$ 1582 million in 2025 and is forecast to a readjusted size of US\$ 2049 million by 2032 with a CAGR of 3.8% during review period.

Frozen meat grinders are versatile and widely used meat processing equipment in the meat production industry. Their operating principle involves pushing raw meat from the hopper into the pre-cutting plate through a screw, and using the rotational extrusion of the screw to cause relative movement between the perforated plate and the grinding blade, thereby cutting the raw meat into granular shapes. This method ensures the uniformity of the meat filling and can achieve the desired meat filling requirements through different combinations of perforated plates.

Frozen meat grinders offer various advantages, such as good versatility, wide applicability, and high production efficiency; they have the capability to grind frozen meat, saving time, effort, preserving freshness, and ensuring quality; the grinding process is short in duration and low in temperature rise, conducive to preservation and extending shelf life. They are suitable for various food processing stages, capable of grinding frozen and fresh meat into meat particles of different diameters to meet the processing needs of different products.

Market Driver:

1. Rising Global Meat Consumption & Processed Food Demand: Increasing demand for high-quality protein in emerging economies and the global popularity of processed meat products (sausages, burgers) are primary growth drivers.

2. Growth in Related Industries: The expansion of the catering industry (restaurants, food service) and the rising demand for premium, meat-based pet foods are creating new, significant application segments.

3. Demand for Efficiency & Food Safety: Grinders that process meat directly from frozen (-18°C) eliminate thawing time, reduce bacterial growth, preserve meat texture and nutritional integrity, and lower overall energy costs.
