FRP Static Mixer is a corrosion-resistant mixing device constructed from Fiber Reinforced Plastic (FRP), featuring lightweight, high strength, and exceptional chemical resistance for industrial fluid processing. Its stationary helical or corrugated elements split and recombine fluid streams to achieve homogeneous mixing, dispersion, or heat transfer without moving parts. The FRP material withstands aggressive media (acids, alkalis, brine) with 3-5x longer service life than metal mixers at 1/4 the weight of stainless steel. Common applications include wastewater chemical dosing, pH adjustment in chemical plants, and additive dispersion in desalination systems, operating at -40°C to 120°C and 1.0MPa pressure.
