Abstracts

Fruit jellies can be defined as a soft and elastic food product made usually by boiling fruit juice and sugar along with gelatin or pectin contained in fruits. Manufacturers of fruit jellies usually use high methoxyl pectin (HMP) to prepare fruit jellies and low methoxyl pectin (LMP) when there is a need to prepare low or sugar-free fruit jellies. The global fruit jellies market forms a minor segment of the global sugar and sugar-free confectionery market.

Scope of the Report:

This report focuses on the Fruit Jellies in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The HMP segment accounted for the major shares of the fruit jellies market. Factors such as the capability to form sugar-acid-pectin gels and low-water-activity gels will contribute to the growth of this industry segment in the coming years.

This market study estimates that in terms of geographic regions, EMEA will be the major revenue contributor to the fruit jellies market throughout the forecast period. The rising disposable incomes of consumers in Eastern European economies and the growing number of organized retailing stores in the region will drive the growth of the fruit jellies market.

The worldwide market for Fruit Jellies is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
