According to our (Global Info Research) latest study, the global FTTx Blown Fibre Cable market size was valued at USD 2609.4 million in 2023 and is forecast to a readjusted size of USD 5772.4 million by 2030 with a CAGR of 12.0% during review period.

FTTx Blown Fibre Cable is an efficient way to install fiber optic cable and facilitates future expansion of optical fiber networks. Fibers can be installed in areas that are hard to reach or that have limited access. Air Blown Fiber is also recommended for environments where there will be many changes and additions to the network. It also allows for duct installation before you know how much fiber is actually required, and so eliminates the need to install dark fibers. It also reduces splicing and interconnection points so optical loss is minimized and system performance is enhanced.

The main manufacturers of FTTx Blown Fibre Cable are Corning, YOFC and ZTT, etc. The top five manufacturers account for about 50% of the share. North America is the largest market with about 45% share, followed by Europe and Middle East & Africa with over 20% and 15% share. Single Core is the largest segment with about 80% share.
