The global Fuel Cell Humidifier market size is expected to reach \$ 982.1 million by 2029, rising at a market growth of 43.6% CAGR during the forecast period (2023-2029).

Global main manufacturers of fuel cell humidifier include KOLON, Perma Pure LLC and Freudenberg Filtration Technologies, etc. The top three players hold a share about 84%. South Korea is the largest producer, holds a share around 52%, followed by North America and Europe, with share 23% and 18%, separately. The largest market is South Korea, holds a share about 55%. In terms of power, fuel cell humidifiers with a power range of 50-80KW are the largest subdivision, accounting for approximately 42% of the market share. At the same time, in terms of application, Fuel Cell Cars are the largest downstream field, accounting for approximately 76%.

During the reaction process of a fuel cell reactor, the proton exchange membrane needs to maintain a certain level of humidity in order to maintain a high reflection efficiency, therefore the reaction medium needs to carry a certain amount of water vapour into the reactor, this step is usually achieved through a humidifier. Fuel cell humidifiers can help to maintain the humidity and thermal energy in the fuel cell for optimum operation and lifetime.
