Fuel management systems are used to maintain, control and monitor fuel consumption and stock in any type of industry that uses transport, including rail, road, water and air, as a means of business. They are critical in industries where extensive amounts of fuel is used by multiple team members, such as in mining, civil construction and municipalities.

Fuel Management Systems track how much fuel has been taken and who by, but different systems available in the market have varying capabilities.

To access fuel with a Fuel Management System, a form of identification must be used. This can be linked to an individual via a PIN, fob key or NFC card or to a vehicle via ID or touch keys.

The top 3 Leading players in the fuel management system market are OPW Fuel Management Systems, TRISCAN GROUP and Franklin Fueling Systems, with about 9% market shares.
