Abstracts

According to our (Global Info Research) latest study, the global Fuel-Powered Wide Body Dump Truck market size was valued at US\$ 592 million in 2025 and is forecast to a readjusted size of US\$ 877 million by 2032 with a CAGR of 5.9% during review period.

In 2025, global production of fuel-powered wide body dump trucks reached 5,280 units, with an estimated average selling price of US\$109,000 per unit. Fuel-powered wide body dump trucks are off-highway wide-body transport vehicles powered by diesel engines, developed for open-pit mines, large-scale earthmoving, sand and gravel aggregate transport, short-haul port transport, water conservancy projects, and large-scale infrastructure projects. They typically feature wide bodies, high-strength frames, large-capacity cargo boxes, reinforced axles, high-powered diesel engines, heavy-duty tires, and hydraulic lifting systems. They emphasize low procurement costs, high loading efficiency, strong passability, and adaptability to complex mining terrain. They are mainly used for short-distance cyclical transport of ore, coal, sand and gravel, stripped soil, tailings, and engineering waste. The upstream of the industry chain mainly includes diesel engines, transmissions, drive axles, mining tires, high-strength steel, chassis and cargo box structural components, hydraulic lifting systems, braking systems, suspension systems, cabs, electronic control systems, and after-treatment systems. The midstream involves complete machine manufacturing, with core components including chassis design, matching to mining conditions, powertrain integration, cargo box wear-resistant design, chassis reinforcement, braking safety, suspension tuning, and after-sales service network construction. Downstream customers are mainly open-pit coal mines, metal mines, non-metal mines, aggregate suppliers, water conservancy and hydropower construction companies, port logistics

companies, large-scale earthwork contractors, and mining transportation service providers. Gross profit margin is approximately 20%-35%.
