According to our (Global Info Research) latest study, the global Fueled Driven Welder market size was valued at USD 481.4 million in 2023 and is forecast to a readjusted size of USD 622.1 million by 2030 with a CAGR of 3.7% during review period.

Fueled Driven Welders incorporate a gasoline, diesel, or propane fueled engine coupled to an electrical generator to produce power for Stick, TIG, MIG and Flux-majord welding. Fueled driven welders are typically transported on a truck or trailer and are primarily used outdoors. The electricity generated by an engine driven welder powers fans, pumps, air compressors or other electrical tools commonly found on jobsites. During power outages, an fueled driven welder can also be used as a backup generator.

Major global players of fuel driven welders include Lincoln Electric, Miller, ESAB, Denyo and Shindaiwa. The top five global players by revenue account for almost 69 per cent. North America is the world's largest market with a market share of about 37 percent, followed by Europe and Asia Pacific with about 33 percent and 25 percent respectively. By product type, diesel-powered welders are the largest market segment with 68 percent share, and by application, oil and gas has the largest share with about 21 percent.
