## Abstracts

According to our (Global Info Research) latest study, the global Full-body Pneumatic Lymphatic Drainage Set market size was valued at US\$ 218 million in 2025 and is forecast to a readjusted size of US\$ 368 million by 2032 with a CAGR of 5.2% during review period.

In 2025, global full-body pneumatic lymphatic drainage set production reached approximately 3,200,000 units. The full-body pneumatic lymphatic drainage detox system is a pneumatic massage device designed for body circulation care and auxiliary lymphatic drainage therapy. It mainly applies rhythmic pressure to the limbs, waist, abdomen, and other body areas through segmented inflatable airbags, helping to promote lymphatic and blood circulation, reduce swelling, relieve fatigue, enhance metabolism, and support body detoxification. The system typically consists of a main control unit, an air pressure control system, and multiple airbag garments for the arms, legs, waist, and abdomen. Pressure intensity, circulation modes, and treatment duration can be adjusted according to different care needs. Full-body pneumatic lymphatic drainage detox systems are widely used in beauty salons, rehabilitation centers, medical aesthetics institutions, sports recovery centers, and home healthcare settings. They are mainly suitable for postoperative recovery, lymphatic circulation care, body contouring, muscle relaxation after exercise, and relief of fatigue caused by prolonged sitting or standing. With growing consumer interest in health management, non-invasive care, and comfortable treatment experiences, these devices are gradually evolving toward intelligent control systems, multi-mode massage functions, wireless portability, quiet operation, and personalized care programs.

The full-body pneumatic lymphatic drainage detox system market has maintained

steady growth in recent years, driven by increasing health management awareness, rising demand for body contouring, and the growing popularity of non-invasive care devices. As an auxiliary device for circulation care and lymphatic drainage, it is widely used in beauty salons, rehabilitation centers, medical aesthetics institutions, sports recovery centers, and home healthcare settings. The system is commonly applied for edema relief, postoperative recovery, body relaxation, sports recovery, and alleviation of fatigue caused by prolonged sitting. As consumers place greater emphasis on comfort, safety, and personalized care experiences, market demand for features such as segmented air pressure control, multi-mode circulation massage, intelligent timing systems, precise pressure adjustment, and full-body multi-area compatible suits continues to increase. At the same time, beauty and wellness institutions are promoting the upgrade of such equipment toward intelligent operation, lightweight design, quiet performance, and multifunctional integration in order to enhance service differentiation and added value. In the future, driven by the upgrading of health-related consumption, expanding rehabilitation care needs, and the growing adoption of home healthcare devices, the full-body pneumatic lymphatic drainage detox system market is expected to maintain strong growth potential. However, industry competition will increasingly focus on massage effectiveness, safety, equipment stability, wearing comfort, ease of operation, and brand service capabilities.
