According to our (Global Info Research) latest study, the global Full Screen Module market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The popularity of full-screen displays has put forward production capacity and technology upgrade requirements for module manufacturers that produce full-scale displays. On the one hand, the processing difficulty of full-screen display modules has become more difficult, and the production process has become longer, resulting in a decrease in the capacity utilization rate of the industry, and new production capacity needs to be supplemented to meet the needs of the industry. On the other hand, the product processing accuracy requirements of full-screen display modules are higher. High, newer module processing technology and processing equipment are required to ensure the quality of full-screen products.
