Full spectrum light is light that covers the electromagnetic spectrum from infrared to near ultraviolet, or all wavelengths useful to plant or animal life; in particular, even though the distribution of the solar spectrum that reaches Earth changes with time of day, latitude, and atmospheric conditions, Sunlight is also considered full spectrum.

Full spectrum is not a technical term when applied to lighting. Rather, it means that the product simulates some important qualities of natural light.

Full spectrum lighting can be used on tropical and saltwater fish, as well as many other aquatic pets, and full-spectrum lighting can also assist colorists with color correction. Full-spectrum lighting is widely used in animal and plant breeding, industrial and commercial lighting, residential lighting and other fields.
