Abstracts

According to our (Global Info Research) latest study, the global Full Tab Ternary (NCM/NCA) Lithium Cells market size was valued at US\$ 617 million in 2025 and is forecast to a readjusted size of US\$ 3184 million by 2032 with a CAGR of 26.4% during review period.

Full Tab Ternary (NCM/NCA) Lithium Cells are lithium-ion cells that combine a full-tab current-collection structure with ternary cathode systems such as NCM or NCA, designed to deliver higher energy density, stronger high-rate discharge capability, improved heat dissipation, and better stability under high-load operation. Compared with conventional ternary lithium cells using standard tab structures, their advantages lie in lower internal resistance, faster current transmission, stronger power output, better thermal control, and higher suitability for compact high-power battery packs. In 2025, production was approximately 240 million units and the average price was USD 2.5 per unit. The industry's capacity utilization rate in 2025 was about 65% and the average gross margin was around 25%. Upstream, the key materials include ternary cathode materials, anode materials, and separators, with representative suppliers such as BTR, Shanshan, and Yunnan Energy New Material supporting the core material system for high-performance lithium-ion cells. The midstream segment focuses on full-tab ternary cell structure design, NCM/NCA electrode formulation, current-collection path optimization, winding process control, electrode welding, electrolyte injection, formation and grading, safety testing, consistency management, thermal performance verification, and automated mass production, which together determine energy density, power output, heat dissipation, cycle life, safety reliability, and cost competitiveness. Downstream, Full Tab Ternary (NCM/NCA) Lithium Cells are mainly used in power tools, portable energy storage, and data center backup batteries.

Full Tab Ternary (NCM/NCA) Lithium Cells will be driven by applications that require both high energy density and strong power delivery. In power tools, the full-tab structure helps ternary cells release high current more efficiently while controlling heat during frequent load changes. In portable energy storage, the advantage is a better balance between compact size, endurance, and output power. For data center backup batteries, stable pulse discharge, consistency, and thermal safety become more important during emergency switching. As downstream customers raise requirements for energy, power, and reliability at the same time, competition will shift toward full-tab design, ternary material stability, welding quality, and cell consistency.

This report is a detailed and comprehensive analysis for global Full Tab Ternary (NCM/NCA) Lithium Cells market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Full Tab Ternary (NCM/NCA) Lithium Cells market size and forecasts, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Full Tab Ternary (NCM/NCA) Lithium Cells market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Full Tab Ternary (NCM/NCA) Lithium Cells market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (K Units), and average selling prices (US\$/Unit), 2021-2032

Global Full Tab Ternary (NCM/NCA) Lithium Cells market shares of main players, shipments in revenue (\$ Million), sales quantity (K Units), and ASP (US\$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Full Tab Ternary (NCM/NCA) Lithium Cells

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Full Tab Ternary (NCM/NCA) Lithium Cells market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include EVE Energy (China), Sunpower (China), Lishen (China), BAK Battery (China), Greatpower (China), Ampace (China), Guangdong Greenway Technology (China), Tenpower (China), Reliance (China), BTCAP (China), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Full Tab Ternary (NCM/NCA) Lithium Cells market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

21700 Battery Cells

18650 Battery Cells

Others

Market segment by Single-Cell Capacity

4000mAh

5000mAh

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Market Analysis by Type

1.3.1 Overview: Global Full Tab Ternary (NCM/NCA) Lithium Cells Consumption Value by Type: 2021 Versus 2025 Versus 2032

1.3.2 21700 Battery Cells

1.3.3 18650 Battery Cells

1.3.4 Others

1.4 Market Analysis by Single-Cell Capacity

1.4.1 Overview: Global Full Tab Ternary (NCM/NCA) Lithium Cells Consumption Value by Single-Cell Capacity: 2021 Versus 2025 Versus 2032

1.4.2 4000mAh

1.4.3 5000mAh

1.4.4 Others

1.5 Market Analysis by Maximum Current

1.5.1 Overview: Global Full Tab Ternary (NCM/NCA) Lithium Cells Consumption Value by Maximum Current: 2021 Versus 2025 Versus 2032

1.5.2 30A?Current
