The fully automatic edge sealer is an automated equipment used in the packaging industry, mainly used for sealing and cutting bagged products. It feeds the packaging material into the equipment through a high-speed conveyor belt, uses edge seal technology to heat seal both sides of the packaging bag, and automatically cuts off excess bag material to form a sealed complete packaging bag. The equipment can greatly improve production efficiency, reduce manual operations, and ensure consistent and stable sealing quality. It is widely used in packaging production lines in industries such as food, medicine, daily chemical products, and electronic accessories.
