According to our (Global Info Research) latest study, the global Fully Automatic Insufflator market size was valued at US\$ 757 million in 2025 and is forecast to a readjusted size of US\$ 1267 million by 2032 with a CAGR of 7.7% during review period.

In 2024, global fully automatic insufflator production reached approximately 0.076 million units, with an average global market price of around US\$ 8,950 per unit.

The gross profit margin of major companies in the industry is between 48% ? 68%.

In 2024, the global production capacity of fully automatic insufflators was approximately 0.10 million units.

A fully automatic insufflator is a medical device designed to precisely deliver and regulate carbon dioxide gas into body cavities during minimally invasive surgical procedures. It provides stable pressure control, adjustable flow rates, and real-time safety monitoring to maintain optimal surgical visibility and patient safety.

The industrial chain includes upstream suppliers of pressure and flow sensors, medical gas valves, control electronics, software modules, and sterilizable enclosures. The midstream consists of medical device manufacturers integrating gas control systems, automation algorithms, alarm functions, and calibration processes. Downstream applications include laparoscopic and endoscopic surgeries in hospitals, surgical centers, and specialized clinics.

The fully automatic insufflator market is supported by the increasing adoption of

minimally invasive surgeries worldwide, where precise gas control is essential for procedural safety and efficiency. Higher unit pricing reflects advanced sensing accuracy, automated pressure regulation, and compliance with stringent medical standards. Growth is driven by rising surgical volumes, aging populations, and expanding access to laparoscopic procedures in emerging markets. Manufacturers continue to enhance reliability, user interface design, and integration with surgical systems. As minimally invasive techniques continue to replace open surgeries, fully automatic insufflators are expected to maintain solid growth in the global medical device market.
