Fully fashioned knitting computer flat knitting machine refers to a weft knitting equipment that can complete the knitting of an entire garment at one time without the need for subsequent cutting and sewing processes. The current full-fashion technology can be divided into two-needle bed forming, four-needle bed forming, etc. Compared with ordinary computer flat knitting machines, fully fashioned knitting computer flat knitting machines have the characteristics of simplifying the process, reducing the consumption of yarn and raw materials, and achieving truly seamless knitting. It naturally fits the objective situation of the shortage of labor for sewing in the domestic sweater production process and the pursuit of fashion and environmental protection by international brands and consumers.
