According to our (Global Info Research) latest study, the global Fully MagLev Ventricular Assist Device (VAD) market size was valued at US\$ 1293 million in 2025 and is forecast to a readjusted size of US\$ 2785 million by 2032 with a CAGR of 11.7% during review period.

A ventricular assist device (VAD) is a device that helps pump blood from the lower chambers of the heart to the rest of the body. The MagLev (Magnetic Levitation) ventricular assist device (VAD), also known as a magnetic levitation artificial heart, is an advanced medical device used to treat severe heart failure. The magnetic levitation VAD belongs to the third generation of centrifugal pump type VAD, which is divided into fully magnetic levitation and magnetic-fluid hybrid levitation bearing technology. The fully magnetic levitation VAD uses a fully magnetically levitated centrifugal pump, which has the advantages of small size, strong biocompatibility, and good infection risk prevention and control.

Currently, the global fully magnetic levitation ventricular assist device (VAD) market is monopolized by Abbott's HeartMate 3, which has now become the most commonly used left ventricular assist device (LVAD) in the world, with a market share of over 80%.

From the perspective of the global VAD device market, the main manufacturer in the United States is Abbott, and full magnetic levitation products have become the absolute mainstream. Competition in Europe is more intense, with more products approved earlier, but they are mainly used the second-generation technology (axial pump). The main player is Berlin heart CmbH.
