## Abstracts

The global Functional Flour market size is expected to reach \$ 69530 million by 2029, rising at a market growth of 6.1% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Functional Flour are ADM, Ardent Mills, Scoular, Henan Huangguo Grain and Ingredion, which make up over 3%. Among them, ADM is the leader with about 1% market share.

Asia-Pacific is the largest market, with a share about 45%, followed by Europe and Americas, with the share about 21% and 30%. In terms of product type, Rice Flour occupies the largest share of the total market, about 40%. And in terms of application, the largest application is Bakery, followed by Soups & Sauces.

The functional flours market is directly influenced by the growing processed food industry. The rise in consumption of bakery and R.T.E products in developing economies is driving the market. Busy work schedules demand on-the-go consumption and convenient meals. In addition to this, health and wellness consciousness among consumers, and rise in income levels have boosted sales of functional flours as base ingredients and thickening agents. Food safety legislations and health hazards of gluten (for gluten-sensitive individuals) have helped in educating consumers about the benefits offered by functional flours in food products. In light of the benefits offered by different functional flours, and the increasing demand for bakery and R.T.E. products, governments of various countries are promoting the functional flours industry, assisting the manufacturers and suppliers of this industry.

This report studies the global Functional Flour production, demand, key manufacturers, and key regions.
