## Abstracts

The global Functional Yeast Extracts market size is expected to reach \$ 3331 million by 2032, rising at a market growth of 7.0% CAGR during the forecast period (2026-2032).

Functional yeast extracts are ingredients derived from yeast cells through controlled extraction and processing, designed to provide specific functional benefits such as flavor enhancement, nutritional fortification, and bioactive support. These extracts are widely used in food and beverage formulations, savory products, functional foods, dietary supplements, and animal nutrition to improve taste profiles, reduce sodium content, and deliver proteins, peptides, nucleotides, and beta-glucans. In 2025, the average selling price of functional yeast extracts is approximately US\$5.6 per kilogram, with global sales volume reaching around 360,000 metric tons. The industry maintains a gross margin of 35%–55%, supported by scalable fermentation processes, formulation versatility, and growing demand for natural and multifunctional ingredients.
