Abstracts

According to our (Global Info Research) latest study, the global Furniture market size was valued at USD 422740 million in 2023 and is forecast to a readjusted size of USD 553440 million by 2030 with a CAGR of 3.9% during review period.

Furniture refers to movable objects intended to support various human activities such as seating (e.g., chairs, stools, and sofas), eating (tables), and sleeping (e.g., beds). Furniture is also used to hold objects at a convenient height for work (as horizontal surfaces above the ground, such as tables and desks), or to store things (e.g., cupboards and shelves). Furniture can be a product of design and is considered a form of decorative art. In addition to furniture's functional role, it can serve a symbolic or religious purpose. It can be made from many materials, including metal, plastic, and wood.

The home furniture segment accounts for the largest revenue share due to the evolution of flat-pack and RTA furniture. To cater to the rising demand, the vendors in the market are focusing on manufacturing flat-pack furniture for medium-price segments and solid wood furniture targeted at the high-end market.

The Global Info Research report includes an overview of the development of the Furniture industry chain, the market status of Household (Metal Furniture, Plastic Furniture), Office (Metal Furniture, Plastic Furniture), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Furniture.

Regionally, the report analyzes the Furniture markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing
