Abstracts

The global Furniture and Furnishing E-commerce market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In an e-commerce transaction, customers can browse products, place orders, & make payments through online platforms such as websites or mobile applications. These platforms serve as digital storefronts where businesses showcase their products or services & facilitate transactions.

E-commerce offers numerous advantages over traditional retail. It provides convenience, as customers can shop from the comfort of their homes or anywhere with an internet connection. The availability of a vast range of products & the ability to compare prices across different retailers give consumers greater choices & the ability to make informed decisions. E-commerce also allows businesses to reach a global customer base, expanding their market reach beyond geographical boundaries.

E-commerce, short for electronic commerce, refers to the buying & selling of goods & services over the Internet. It involves conducting business transactions, including online retail sales, electronic fund transfers, & online auctions. E-commerce eliminates the need for physical presence or direct interaction between buyers & sellers, enabling transactions to occur virtually.
