Abstracts

The global Furniture Spray Painting Robot market size is expected to reach $ 299 million by 2032, rising at a market growth of 9.5% CAGR during the forecast period (2026-2032).

In 2025, global sales of Furniture Spray Painting Robots were approximately 1,100 units, with an average selling price of around US$140,000 per unit. The gross margin of major manufacturers was approximately 32%–40%.

Furniture Spray Painting Robot is a robotic coating system specifically designed for the automated surface finishing of furniture and wood products, with a multi-axis industrial robotic arm serving as the core motion and execution unit. The system typically consists of a six-axis articulated robot or other multi-axis robot, spray guns, a paint supply system, robot controller, safety protection devices, and a spray booth. Some advanced systems are also integrated with 3D vision, workpiece recognition, automatic path generation, and spraying parameter control functions, enabling the spraying trajectory to be adjusted according to the dimensions, geometry, and surface contours of the workpiece. These robots are mainly used for the application of primers, topcoats, clear coats, water-based wood coatings, and other liquid coatings, and are suitable for flat surfaces, edges, curved surfaces, grooves, and irregularly shaped structures.

The upstream industry of Furniture Spray Painting Robots mainly includes industrial robots, servo motors, reducers, controllers, explosion-proof spray guns, pumps and valves, paint supply systems, vision sensors, and safety protection equipment. Downstream applications mainly include furniture manufacturing, wooden door manufacturing, and other wood product processing industries. Compared with conventional automated spraying equipment, Furniture Spray Painting Robots offer

greater trajectory flexibility and three-dimensional motion capability, making them particularly suitable for flexible production involving multiple product varieties, small production batches, irregularly shaped workpieces, and complex surfaces.
