Abstracts

According to our (Global Info Research) latest study, the global Fuse Blocks & Holders market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A fuse block can either be independent, where each fused circuit has an input wire and an output wire, or ganged, where power is shared among all the circuits. Fuse holders are devices for containing, protecting and mounting fuses. Independent fuse blocks require two wires to be run for each fuse, one from the power source, and one to the accessory. A ganged fuse panel requires a heavier power wire to be run to the panel, and a single wire runs out to each accessory in the system.
