According to our (Global Info Research) latest study, the global Fused Aluminate Cement market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Fused calcium aluminate cement is a special cement material made by melting bauxite and limestone at high temperature and then cooling them. Its main component is calcium aluminate. This cement has excellent high temperature resistance, corrosion resistance and chemical erosion resistance. It is widely used in refractory and thermal insulation materials in furnaces, metallurgy and chemical industries to ensure the stability and durability of the structure.

At present, the industry is generally decentralized, with individual companies being small in scale. The world's top three manufacturers are Elfusa, U.S. Electrofused Minerals (USEM) and Calucem. The domestic quotation in China is about RMB 5,400/ton. The main brands include 625, 725 and 925 fused calcium aluminate cement. There is little price difference between domestic and foreign markets, and the current market size is relatively small.
