Abstracts

Fused couplers Comprising: a single-mode optical fibre SMF and an orbital angular momentum fibre OAMF, the optical fibre has a coupling section in which the fibres are aligned longitudinally side by side and fused at least over the length of the coupling where the SMF is located. The SMF and OAMF are tapered so that the diameter of the SMF and the diameter of the OAMF match the orbital angular momentum OAM of the OAMF mode with the effective refractive index of the single-mode SMF and the coupling wavelength of the light.
