Abstracts

According to our (Global Info Research) latest study, the global Fusion Power Module market size was valued at US\$ 22691 million in 2025 and is forecast to a readjusted size of US\$ 50646 million by 2032 with a CAGR of 12.1% during review period.

The fusion power module is an integrated, prefabricated data center power supply solution. It's not a single device, but rather a modular "building block" that integrates, pre-installs, and pre-tests all the power supply and distribution equipment required by a data center (such as transformers, UPS, distribution cabinets, batteries, monitoring systems, etc.) in the factory. Through end-to-end collaborative design and deep device matching, it maintains high efficiency over a wider load range. A built-in unified intelligent management system enables end-to-end visibility, manageability, and controllability, supporting predictive maintenance.
