Abstracts

According to our (Global Info Research) latest study, the global Galvanized Steel Wire Mesh market size was valued at US\$ 138 million in 2024 and is forecast to a readjusted size of USD 174 million by 2031 with a CAGR of 3.1% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Galvanized steel wire mesh is divided into hot-dip galvanized steel wire mesh and cold-dip galvanized steel wire mesh. Galvanized steel wire mesh is made of high-quality low-carbon steel wire and is made by precise automated mechanical technology and electric welding. The mesh surface is flat, the structure is strong, and the integrity is strong. Even if the galvanized steel wire mesh is partially cut or partially subjected to pressure, it will not loosen. After the steel wire mesh is formed, it is galvanized (hot-dip) for good corrosion resistance. It has advantages that ordinary steel wire mesh does not have and can be used as an exterior wall insulation series. Galvanized steel wire mesh can be used for poultry cages, egg baskets, channel fences, drainage gutters, porch guardrails, rodent-proof nets, machinery protection covers, livestock and plant fences, grids, etc., and is widely used in industry, agriculture, construction, transportation, mining and other industries.
