Abstracts

The global Galvanized Steel Wire market size is expected to reach \$ 3135 million by 2032, rising at a market growth of 6.4% CAGR during the forecast period (2026-2032).

Galvanized steel wire is a kind of product made by drawing high-quality carbon structural steel and then heat-treating and galvanizing it, which is mainly used in the manufacture of electric power and communication, galvanized steel wire mesh, construction engineering, springs and all kinds of steel wire ropes. With the promotion of urbanization and power grid upgrading, the application range of galvanized steel wire continues to broaden, from the traditional electric power, communication field gradually to the net fence and other fields.

The current state of the galvanized steel wire market is showing positive developments, despite some challenges.

the global key manufacturers of Galvanised Steel Wire include Bekaert SA, ArcelorMittal, The Heico Companies, Henan Hengxing Science & Technology Co., Ltd, Shandong Jingwei Steel Cord co., LTD, Qian'an Xinghua Metal Products Co., Ltd, Zhejiang Guanming Power Transmission Material Corp, HeBei ZhiDaWeiYe Commlinications Equipment Co., Ltd, Tianjin Quanyou Steel Rope Co.,LTD, Si Chuan Donggang New Materials Co., Ltd., etc. In 2023, the global top 10 players had a share approximately 42.0% in terms of revenue.

Technology, electro-galvanized steel wire is one of the mainstream products in the market, which is obtained by electrodeposition through an applied power source, and the coating obtained consists of fine pure zinc grains. Hot-dip galvanizing, on the other hand, relies on physical heat diffusion to form the coating, first forming an iron and zinc

compound, and then generating a pure zinc layer on the surface of the iron and zinc compound. These two methods have their own advantages, to meet the needs of different areas.

On the market front, the galvanized steel wire industry is facing a number of challenges. In March 2024, shipments from 154 galvanized companies across the country suffered a 7.89% decline, with a particularly significant reduction of 10.94% in central China. This data reflects the sluggish development of the galvanized industry in the current market environment and provides an important market reference for investors.

However, the development prospect of galvanized steel wire industry is still optimistic. With global and Chinese galvanized steel wire industry research shows that the galvanized steel wire market is expected to grow at a certain CAGR between 2023 and 2029. This indicates that despite some volatility faced by the current market, the galvanized steel wire industry still has a high potential for growth in the long run.

In conclusion, the galvanized steel wire market is facing challenges, but also showing positive development trends and broad market prospects. With the progress of technology and the expansion of application areas, galvanized steel wire is expected to continue to maintain the growth trend in the future.

In recent years, China's galvanized steel wire industry has shown a growth trend in both production and demand, which reflects the increasing demand for galvanized steel wire in the market. With the advancement of technology and environmental protection requirements, galvanized steel wire industry is experiencing structural optimization and upgrading, especially in the new energy, environmental protection, high-end manufacturing and other areas of rapid development, for the galvanized steel wire industry has brought new market opportunities. In terms of market competition, galvanized steel wire market players, enterprises need to improve product quality, technical level and brand building to cope with market competition.
