## Abstracts

According to our (Global Info Research) latest study, the global Gambling and Gaming ID Verification market size was valued at US\$ 3108 million in 2025 and is forecast to a readjusted size of US\$ 4662 million by 2032 with a CAGR of 6.0% during review period.

Gambling and gaming identity verification is a mandatory digital identity verification system designed specifically for regulated gaming (iGaming), online casinos, sports betting, and lottery platforms. It aims to create an unforgeable link between the player's real identity and the account operator. It is not an anonymous identity mapping system typical of games, but rather a compliance technology combination based on KYC (Know Your Customer) and AML (Anti-Money Laundering) as legal bottom lines. Its core mechanisms include ID document authentication, biometric liveness detection, geofencing, and real-time access to self-exclusion lists. Unlike conventional game identity verification, this system possesses dual attributes of 'quasi-financial regulation' and 'social protection'?it must prevent money laundering and fraud while also intercepting minors, cross-border restricted players, and addicts who self-isolate. Its operational friction and security level are significantly higher than in ordinary digital entertainment scenarios.

Under the triple pressures of generative AI-driven deepfake fraud, the expansion of global gambling legalization areas, and surging regulatory fines, gambling identity verification is evolving from a 'registration checkpoint' to a 'continuous trust layer throughout the entire journey.' Over the next three years, contactless re-authentication based on passive liveness detection will replace passwords and CAPTCHAs, verifying players' identities in milliseconds during high-amount withdrawals and unusual betting. Digital identity infrastructures in countries like Sweden's BankID and the Netherlands'

iDIN will be deeply embedded in gaming login portals, achieving a balance between compliance and zero friction. Meanwhile, the opposing trend of 'KYC-free encrypted casinos' will force regulatory technology upgrades, with zero-knowledge proofs potentially making it possible to 'prove adulthood' without revealing one's birthdate. Biometrics will no longer be a compliance cost, but rather a core differentiating weapon for operators to win players' trust.

This report is a detailed and comprehensive analysis for global Gambling and Gaming ID Verification market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

### **Key Features:**

Global Gambling and Gaming ID Verification market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Gambling and Gaming ID Verification market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Gambling and Gaming ID Verification market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Gambling and Gaming ID Verification market shares of main players, in revenue (\$ Million), 2021-2026

### **The Primary Objectives in This Report Are:**

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Gambling and Gaming ID Verification

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Gambling and Gaming ID Verification market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Jumio, Sumsb, Alice Biometrics, Regula, Idology, AU10TIX, Mobbeel, iDenfy, HID Global, Shufti, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

### Market segmentation

Gambling and Gaming ID Verification market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
